

Feature	User story
1	As a lender I want to be able to approve borrow requests on an item that I own so that I can successfully lend out an item to one of my peers.
2	As a borrower I want to be able to look at available items before I sign up for a new account. I don't want to have to sign up or subscribe to anything until I know what's going to be available to me.
3	As a lender I want to be able to see the reputation of several borrowers who want to be able to borrow my item. It gives me a chance to make an informed decision on who will borrow the item.
4	As a borrower I want to be able to see comments that users made on a specific item so that I know the condition and people's experience with borrowing the specific item.
5	As a borrower I want to be able to see whether an item is available or not so that I can know whether or not it's possible for me to borrow it at the moment.
6	As a borrower I want to be able to see a picture of the item I want to borrow so that I know the expect what the item should look like.
7	As a lender I want to be able to see all of the requests on a specific item in a concise manner so that I know which request I want to accept or reject.
8	As a lender I want to be able to rate the borrowers that I lend items to once they return them. This allows me to let other people know how the borrower treats the items they borrow.
9	As a lender I want to have a simple form that I can use to post an item to the public list. This makes it easy for potential borrowers to view my item.
10	As a user I want to be able to have an interactive sign up form that lets me know what is required of a user to be eligible to sign up.
